Herbicide Branch

**Subject: XtendiMax® With VaporGrip® Technology, EPA Reg. No. 264-1210;
Updated Fast Track Amendment to Implement Regional Measures
for 2023 Growing Season**

Dear Emily Schmid,

Following discussions between Bayer CropScience LP (Bayer) and EPA regarding Bayer's submissions on September 7, 2022, October 18, 2022, December 13, 2022, January 6, 2023, and February 7, 2023, Bayer is herein submitting an updated version of the XtendiMax® With VaporGrip® Technology master label to support Bayer's proposal to reduce the cut-off of date for in-crop applications of XtendiMax® for soybean and cotton respectively from June 30th and July 30th to June 12th for Illinois (IL) and Indiana (IN), from June 20th and July 30th to June 12th in Iowa (IA) and from June 30th and July 30th to June 20th in South Dakota (SD). Bayer's proposal also includes an additional growth stage cut-off of V4 in soybean and 1st square in cotton in IA, IL and IN.

The State of Nebraska (NE) has been removed from this proposal as the NE Department of Agriculture indicated that they do not support additional restrictions for the use of XtendiMax® with VaporGrip® Technology.

This application is being submitted electronically and contains the following:

- This cover letter
- Application for Pesticide Registration (EPA Form 8570-1)
- Amended Master Label with changes highlighted
- Amended Master Label (clean copy)
